

Why Choose Cisco Application Centric Infrastructure (Cisco ACI)?

Delivering Applications at the Speed of your Business

Cost

Large one-off costs to refresh EoS/EoL hardware cycles.
Large operational costs to maintain spiralling estates.

Lowered

Pay as you grow model, allow you to pay for what you use.
Subscriptions models allow flexible 1, 3, or 5 year cycles in line with the business strategy.

Delivery

Slow and complex to scale for growth.
Long delivery timescales to deploy new solutions in large scale environment.

Faster

Automation of repeatable tasks increases operational efficiencies.
Time to scale the network is reduced by up to 80%.
The delivery of new applications can be done in hours, not days or weeks.

ACI cuts cost, delivery times and operational overheads.

Simplified Design

- Configuration Consistency
- Increased Reliability
- Increased Performance
- Granular Security (Micro-segmentation)

Speed of Delivery

- Automation Capabilities
- Integration with Public Cloud
- Common Application Policy
- Simplified Delivery

Operational Efficiencies

- Increased Visibility
- More time To Innovate
- Easy to Scale
- Monitoring

Re-Imagine your Datacenter today and empower the heart of your business with BestPath and Cisco ACI.
